

# The Art 350 Awning

The Llaza Art 350 is an **icon of classic style** and provides a harmonious relationship between the awning system and its setting by providing simplicity and reliability for large areas. With stylish lines and special emphasis on concealing visible screws, the Art 350's compact support elements improve the overall aesthetics of the awning.

The Art 350 benefits from the strength and resistance of the **internal tensioning** system on the joint that incorporates a flat flexible belt to optimise the transmission of tension, **extending the lifetime** of the awning.

It is ideal for installation on terraces or large balconies and provides the choice of being placed against a **wall** or below the **ceiling**, and can be used with different accessories to increase the functionality.

## Llaza Art 350 System

### A Big Time Support

The ART 350 system with square bar is designed to respond to problems posed by **large installations**.

Thanks to this system, things that seem difficult become easy. The ART 350 awning system covers areas simply and efficiently.

### Smaller Support Elements

The ART 350 system allows you to cover expansive areas without the use of complicated support systems. In fact, all the componentry is manufactured as **small as possible**, to enhance the **compact appearance** of the entire system.

### Adjustment with Precision and Control

The Art 350 adjustment system works in two ways: it controls of the **angle of inclination** of the arms and it **fixes the position** of the arms to prevent unsightly sagging.

### All the Strength of the ART System

The ART model arms are built with the strength and durability **synonymous of the ART internal transmission** system. This system is composed by a flat, flexible ribbon which improves the drive action and prolongs the life of the system. The **ART 350 can exceed 60,000** cycles in comparison to the 3,000 required by current regulations.

# Llaza Art 350 System

## Supports

Two Ways of fixing: **Faced or ceiling fixed.**

Quick, and simple mounting of supports on a 40 x 40 square-section bar. It allows **multiple sets of arms to be added**, so that large widths can be covered.

Arms slope setting from 0° to 90° in all types of fixing.

## Incredible Sizes

The ART 350 system can cover large installations.

A single set of arms enables a width of 5.5 meters and a projection of 3.5 meters.

For longer extensions, the system is designed to incorporate **as many sets of arms as needed** until the **desired width is covered**.

## The Simple Application

The ART 350 system designed and manufactured by Llaza, enables easy fitting of the awning mechanism, thus, the entire awning system can be **fitted quickly and easily** on a 40 x 40 square bar and it benefits from the ART arm adjustment system.

## Arms

These arms feature the ART tensioning system, which optimises the transmission of tension and does not wear away the coating layer.

Their design prevents the arms from rubbing against the fabric at any point in their action.

## Approved Quality

The ART 350 has been designed and manufactured in accordance with directives for length, strength, resistance and safety stipulated by European Standard EN 13561 for class 3.\*

\* Up to 3.5m projection if length does not exceed 5.5m. Dimensions exceeding these are in accordance with class 2.

## Colour Options

The ART 350 components come in optional colours of **White, Ebony** and **Silver**.
